TFL Paneling

Great Choice. Great Look.

THERMALLY FUSED LAMINATE

Thermally Fused Laminate (TFL) panels are a modern alternative to traditional wood finishes. Made by fusing a decorative surface directly to a durable core board under heat and pressure, TFL panels are **highly resistant** to **scratches, moisture** and everyday wear.

Made with **95% recycled wood** TFL panels are environmentally-friendly and sustainable. TFL Panels come in multiple variations, even realistic replica-wood textures; versatility is key to making your living space all that much more unique and comfortable.

BENEFITS OF TFL

- **Durability**
- **Scratch & Stain Resistance**
- **Warp Resistant**
- **Color Consistency**
- **High-Heat & Humidity Tolerance**
- **Environment Friendly**
- **Economical**

Since TFL is an engineered product, it is **designed to last** and **match**, meaning replacement or add-on cabinetry to an existing TFL project will **integrate with ease**. Our TFL line offers **matching accessories guaranteed** to give your project a uniform and clean look.

For warranty information, please visit your **authorized Doverwoods dealer**, or visit our website for further details about TFL panels.

Discover the versatility of **TFL Paneling**, where every swatch tells a design story.

Choose from rich, natural **wood grains** that bring warmth and character, or elevate your space with sophisticated **fabric-inspired textures**. For a bold statement, explore **vibrant solids** that deliver modern simplicity. Then, define the mood with your choice of finish — the sleek, mirror-like depth of **high-gloss** or the refined elegance of **matte**.
